

# BENEFITS OF THE MILTON POLICE HUB

The site will deliver a modern, spacious, and future-proofed police station, which will deliver the following benefits:

Enhanced facilities will enable Cambridgeshire Constabulary to respond to, and investigate, complex crimes such as fraud and online investigations more effectively.

Enhanced facilities allow for the increased use of virtual courts. This reduces the need to travel to court for sentencing, reducing the average time from charge to first hearing.

The increase in cell provision from 12 to 24 will help meet current and future demand, allowing officers to return to frontline duty sooner, rather than transporting or waiting for an available cell for detainees.

The site has better road access, subject to less traffic and will enable officers to respond to calls for service more efficiently.

The new site will meet the increasing population and needs of the south of Cambridgeshire.

The modernised hub will use less energy and reduce carbon emissions, helping to meet Cambridgeshire's climate goals.
